

## Update for the CN being 0

Posted by hchen - 2009/06/29 20:41

---

Hi, Shea. We discussed the CN problem last Wednesday, which returned CN being 0 or less than 10 after running parameterizer land cover and soil. I rechecked my land cover data and found that there are bunch area with NO DATA. I re-download the GAP data and it worked successfully. Just want to let you know that. Thanks for your help.
